## YCAP TACTICAL INVESTMENT

A sub-fund of YCAP Fund SICAV

Class USD B shares (LU0807708390) - HEDGED

This sub-fund is managed by HOMA CAPITAL SA

### Objectives and Investment Policy

#### Objectives

The Sub-Fund will build a flexible portfolio, operating a dynamic asset allocation across global equity, sovereign bond, currency and volatility markets. The exposure will be predominantly achieved using derivatives such as futures and TRS. However, a limited amount of exposure may be obtained directly by investing into stocks and corporate bonds. Money market and government bonds may be used for cash management purposes.

#### Investment Policy

The Sub-Fund seeks to capture significant performance in favorable markets environments while preserving capital in adverse configurations. In order to achieve this objective the Sub-Fund will operate a flexible and dynamic asset allocation within: worldwide stock index futures, i.e. Financial Indices as defined in article 9 of the Grand-Ducal Regulation of 8 February 2008 relating to certain definitions of the amended UCI Law, bond futures, Currency futures, Volatility futures, gold certificates considered as Transferred Securities in the meaning of article 2 of the Grand-Ducal Regulation of 8 February 2008 relating to certain definitions of the amended UCI Law without embedded derivatives, futures and currencies and, Total Return Swaps.

The Sub-Fund may invest in eligible instruments providing exposure to commodities such as derivatives instruments whose underlying assets consist of those exposures may be obtained via direct investment. The Fund will not acquire physical commodities directly, nor will it invest directly in any derivative that has physical commodities as an underlying asset.

The Sub-Fund may be exposed between 0 and 100% of its net assets in global equity, sovereign bond, currency, and volatility markets. Up to 30% of those exposures may be obtained via direct investment. Direct equity investments into micro and small cap equities are limited to 10% of net asset value. Exposure towards emerging markets may be obtained indirectly via futures or TRS within a limit of 25% of net asset value.

The Sub-Fund may invest between 0 and 100% of its net assets in money market instruments, government bonds, corporate bonds and in equities regardless of capitalisations. The Sub-Fund may decide to use short positions to achieve its investment objective only through the use of derivatives instruments. Exposure towards high yield instruments is limited to 20% of net asset value. Sub-Fund may invest no more than 10% of its asset in other UCITs and in UCIs, including EU and non-EU ETFs, investing in bonds or equities, or having a mixed portfolio of bonds and equities according to art 41, 1.e law of 17 December 2010 relating to undertakings for collective investment. The maximum level of exposure is 350%.

#### Asset selection

The investment manager initially discretionally selects a set of diversified assets performing well in various economic conditions: growth, inflation and deflation. Furthermore, the chosen assets must be highly liquid and traded in regulated markets.

#### Portfolio Construction

For those assets, the selection of instruments and their allocation is based on internal research and analysis, proprietary models, and to a lesser extent, models built with partners independent of the management company such as external advisers.

Among the models used, the fund may rely on an investment approach based on artificial intelligence.

The final investment decision remains at the sole discretion of the investment manager.

### Risk and Reward Profile

#### The risk and reward indicator

The risk category was calculated using historical performance data and may not be a reliable indicator of the fund's future risk profile.

The fund's risk category is not guaranteed to remain fixed and may change over time. The lowest category does not mean a "risk free" investment.

#### Other particular risks

##### Market Risk

The value of investments of the fund may go up and down due to changing economic, political or market conditions, or due to an issuer's individual situation.

##### Currency risk

Some of the underlying investments in which the Sub-Fund invest may be denominated in a different currency than the Reference Currency in which such Sub-Fund is denominated; changes in foreign currency exchange rates will affect the value of shares held in such Sub-Funds.

##### Equity securities

The risk associated with investments in equity and equity-type securities include significant fluctuations in market prices, adverse issuer or market information and the subordinate status of equity in relation to debt paper issued by the same company. Different markets also have different clearance and settlement procedures. Delays in settlement could result in a portion of the assets of the Sub-Fund remaining temporarily uninvested and in attractive investment opportunities being missed. Inability to dispose of portfolio securities due to settlement problems could also result in losses. As the Net Asset Value of the Sub-Fund is calculated in its Reference Currency, the performance of investments denominated in a currency other than the Reference Currency shall depend on the strength of such currency against the Reference Currency and on the interest rate environment in the country issuing the currency.

## YCAP FUND SICAV – YCAP TACTICAL INVESTMENT SUB-FUND

### Debt securities

Debt securities involve credit risk to the issuer which may be evidenced by the issuer's credit rating. Bonds or debt securities issued by issuers with a lower credit rating are generally considered to have a higher credit risk and a greater possibility of default than more highly rated issuers. In the event that any issuer of bonds or debt securities experiences financial or economic difficulties, this may affect the value of the bonds or debt securities and any amounts paid on such bonds or debt securities. This may in turn affect the Net Asset Value per Share.

Like equity securities, debt securities are also subject to market volatility risk, exchange rate risk and interest rate risk.

### Derivatives

Derivative markets are volatile, both the opportunity to achieve gains as well as the risk of suffering losses are greater than with investments in securities or money markets instruments.
