

Investment Strategy

YCAP Tactical Investment is a multi-asset fund seeking more attractive risk-adjusted returns than international equity and bond markets.*

In order to achieve this objective, the investment management team uses proprietary models that attempt to estimate market risk and derive an appropriate asset allocation.

Monthly commentary

March was punctuated by the Russian-Ukrainian conflict and the FED's first rate hike since the Covid-19 crisis.

While the first impacts of the war in Ukraine on European growth are already being felt, the U.S. economy seems, for the time being, relatively immune in terms of PMI, consumer confidence and the strength of the job market.

However, despite these positive factors, the FED has opted for a 25 bps rate hike, its policy of supporting growth now being abandoned in favor of fighting inflation.

As for the ECB, it reiterated its willingness not to overreact to short-term inflation figures and, logically, kept its policy rate unchanged.

In this context, equity markets rebounded (MSCI World TR in USD: +2.8%), driven by US equities (S&P 500 TR in USD: +3.7%) while European markets underperformed (Euro Stoxx 50 TR: -0.4%). Inflation expectations rose sharply around the world, with a spectacular increase in Europe (German 2-year breakeven: +170 bps, 10-year: +54 bps). Sovereign rates also rose at a sustained pace (German 10-year: +41 bps; U.S. 10-year: +51 bps) with a strong flattening of the U.S. curve, the 2-10 year slope even turning negative at the very end of the month (-0.06% on March 31).

Over the month of March, the fund delivered a performance of +1.2% versus +0.4% for its benchmark*. Exposure to equities varied between 58% and 64%, while duration was significantly reduced (-68 bps) to 2.9 at the end of the period. This lower duration level, favorable arbitrage between European and US equities, and the overweighting of the energy and materials sectors contributed to the fund's monthly outperformance.
